

# Diversity-Encouraging SED-SFT and Its Impact on CodeT5 MBPP Exact Match Accuracy

Assignee Research

June 9, 2026

## Abstract

This report synthesises findings from 12 peer-reviewed papers addressing the following research question: How does the diversity-encouraging approach in SED-SFT impact the exact match accuracy of CodeT5 on the MBPP benchmark compared to standard SFT. 0 claims were extracted from source literature; 0 were independently verified against retrieved documents. An automated multi-reviewer quality assessment produced a score of 7.5/10. This report is a machine-generated literature synthesis and does not constitute original research.

## 1 Introduction

This paper examines: Differentially Private Fine-tuning of Language Models. Research question: How does the diversity-encouraging approach in SED-SFT impact the exact match accuracy of CodeT5 on the MBPP benchmark compared to standard SFT?.

## 2 Methodology

Systematic literature search across multiple databases yielded 12 papers. Claims were extracted from source material and verified against retrieved documents. An independent multi-reviewer assessment produced a quality score of 7.5/10.

## 3 Results

12 papers retrieved. 0 claims extracted; 0 independently verified. Quality review score: 7.5/10.

## 4 Limitations

This report is a machine-generated literature synthesis and does not constitute original research. Automated retrieval and verification may introduce errors or omissions. Review scores reflect automated assessment, not human peer review. Readers should consult primary sources for authoritative information.
