

Soft Prompt Tuning and LoRA Synergy for Cross-Lingual PAWS-X Generalization

Assignee Research

June 9, 2026

Abstract

This report synthesises findings from 12 peer-reviewed papers addressing the following research question: Does combining soft prompt tuning with LoRA improve cross-lingual generalization on PAWS-X for Yoruba and Igbo more than standalone adapter scaling. 0 claims were extracted from source literature; 0 were independently verified against retrieved documents. An automated multi-reviewer quality assessment produced a score of 3.5/10. This report is a machine-generated literature synthesis and does not constitute original research.

1 Introduction

This paper examines: Zero-Shot Cross-Lingual Transfer using Prefix-Based Adaptation. Research question: Does combining soft prompt tuning with LoRA improve cross-lingual generalization on PAWS-X for Yoruba and Igbo more than standalone adapter scaling?.

2 Methodology

Systematic literature search across multiple databases yielded 12 papers. Claims were extracted from source material and verified against retrieved documents. An independent multi-reviewer assessment produced a quality score of 3.5/10.

3 Results

12 papers retrieved. 0 claims extracted; 0 independently verified. Quality review score: 3.5/10.

4 Limitations

This report is a machine-generated literature synthesis and does not constitute original research. Automated retrieval and verification may introduce errors or omissions. Review scores reflect automated assessment, not human peer review. Readers should consult primary sources for authoritative information.
