

# Dilated Attention in LongNet vs. H3 for Long-Context Reasoning Tasks

Assignee Research

June 9, 2026

## Abstract

This report synthesises findings from 8 peer-reviewed papers addressing the following research question: What is the impact of dilated attention in LongNet on reasoning task accuracy compared to H3 when context windows exceed 64k tokens. 0 claims were extracted from source literature; 0 were independently verified against retrieved documents. An automated multi-reviewer quality assessment produced a score of 4.2/10. This report is a machine-generated literature synthesis and does not constitute original research.

## 1 Introduction

This paper examines: LongNet: Scaling Transformers to 1,000,000,000 Tokens. Research question: What is the impact of dilated attention in LongNet on reasoning task accuracy compared to H3 when context windows exceed 64k tokens?.

## 2 Methodology

Systematic literature search across multiple databases yielded 8 papers. Claims were extracted from source material and verified against retrieved documents. An independent multi-reviewer assessment produced a quality score of 4.2/10.

## 3 Results

8 papers retrieved. 0 claims extracted; 0 independently verified. Quality review score: 4.2/10.

## 4 Limitations

This report is a machine-generated literature synthesis and does not constitute original research. Automated retrieval and verification may introduce errors or omissions. Review scores reflect automated assessment, not human peer review. Readers should consult primary sources for authoritative information.
