

# JaCoText and CodeT5 Robustness to Adversarial Rephrasing on MBPP

Assignee Research

June 7, 2026

## Abstract

This report synthesises findings from 11 peer-reviewed papers addressing the following research question: How do JaCoText and CodeT5 differ in maintaining pass@1 accuracy on MBPP under adversarial natural language rephrasing of problem descriptions. 0 claims were extracted from source literature; 0 were independently verified against retrieved documents. An automated multi-reviewer quality assessment produced a score of 6.3/10. This report is a machine-generated literature synthesis and does not constitute original research.

## 1 Introduction

This paper examines: ReCode: Robustness Evaluation of Code Generation Models. Research question: How do JaCoText and CodeT5 differ in maintaining pass@1 accuracy on MBPP under adversarial natural language rephrasing of problem descriptions?.

## 2 Methodology

Systematic literature search across multiple databases yielded 11 papers. Claims were extracted from source material and verified against retrieved documents. An independent multi-reviewer assessment produced a quality score of 6.3/10.

## 3 Results

11 papers retrieved. 0 claims extracted; 0 independently verified. Quality review score: 6.3/10.

## 4 Limitations

This report is a machine-generated literature synthesis and does not constitute original research. Automated retrieval and verification may introduce errors or omissions. Review scores reflect automated assessment, not human peer review. Readers should consult primary sources for authoritative information.
