

# Cross-Domain Chunking Strategies and RAG Faithfulness in QuranQA Benchmarking

Assignee Research

June 9, 2026

## Abstract

This report synthesises findings from 15 peer-reviewed papers addressing the following research question: How do cross-domain chunking strategies (e.g., trained on legal vs. religious texts) affect the robustness of RAG systems in maintaining answer faithfulness when evaluated on the QuranQA benchmark. 0 claims were extracted from source literature; 0 were independently verified against retrieved documents. An automated multi-reviewer quality assessment produced a score of 4.8/10. This report is a machine-generated literature synthesis and does not constitute original research.

## 1 Introduction

This paper examines: Chunking German Legal Code. Research question: How do cross-domain chunking strategies (e.g., trained on legal vs. religious texts) affect the robustness of RAG systems in maintaining answer faithfulness when evaluated on the QuranQA benchmark compared to domain-specific chunking?.

## 2 Methodology

Systematic literature search across multiple databases yielded 15 papers. Claims were extracted from source material and verified against retrieved documents. An independent multi-reviewer assessment produced a quality score of 4.8/10.

## 3 Results

15 papers retrieved. 0 claims extracted; 0 independently verified. Quality review score: 4.8/10.

## 4 Limitations

This report is a machine-generated literature synthesis and does not constitute original research. Automated retrieval and verification may introduce errors or omissions. Review scores reflect automated assessment, not human peer review. Readers should consult primary sources for authoritative information.
